

## Android Provider App Permissions

When using an Android operating system, this is the first screen that appears after downloading the "Plumb Now: Provider" app

If you already have an account select 'Login' to proceed otherwise select 'Register'

DOWNLOAD NOW

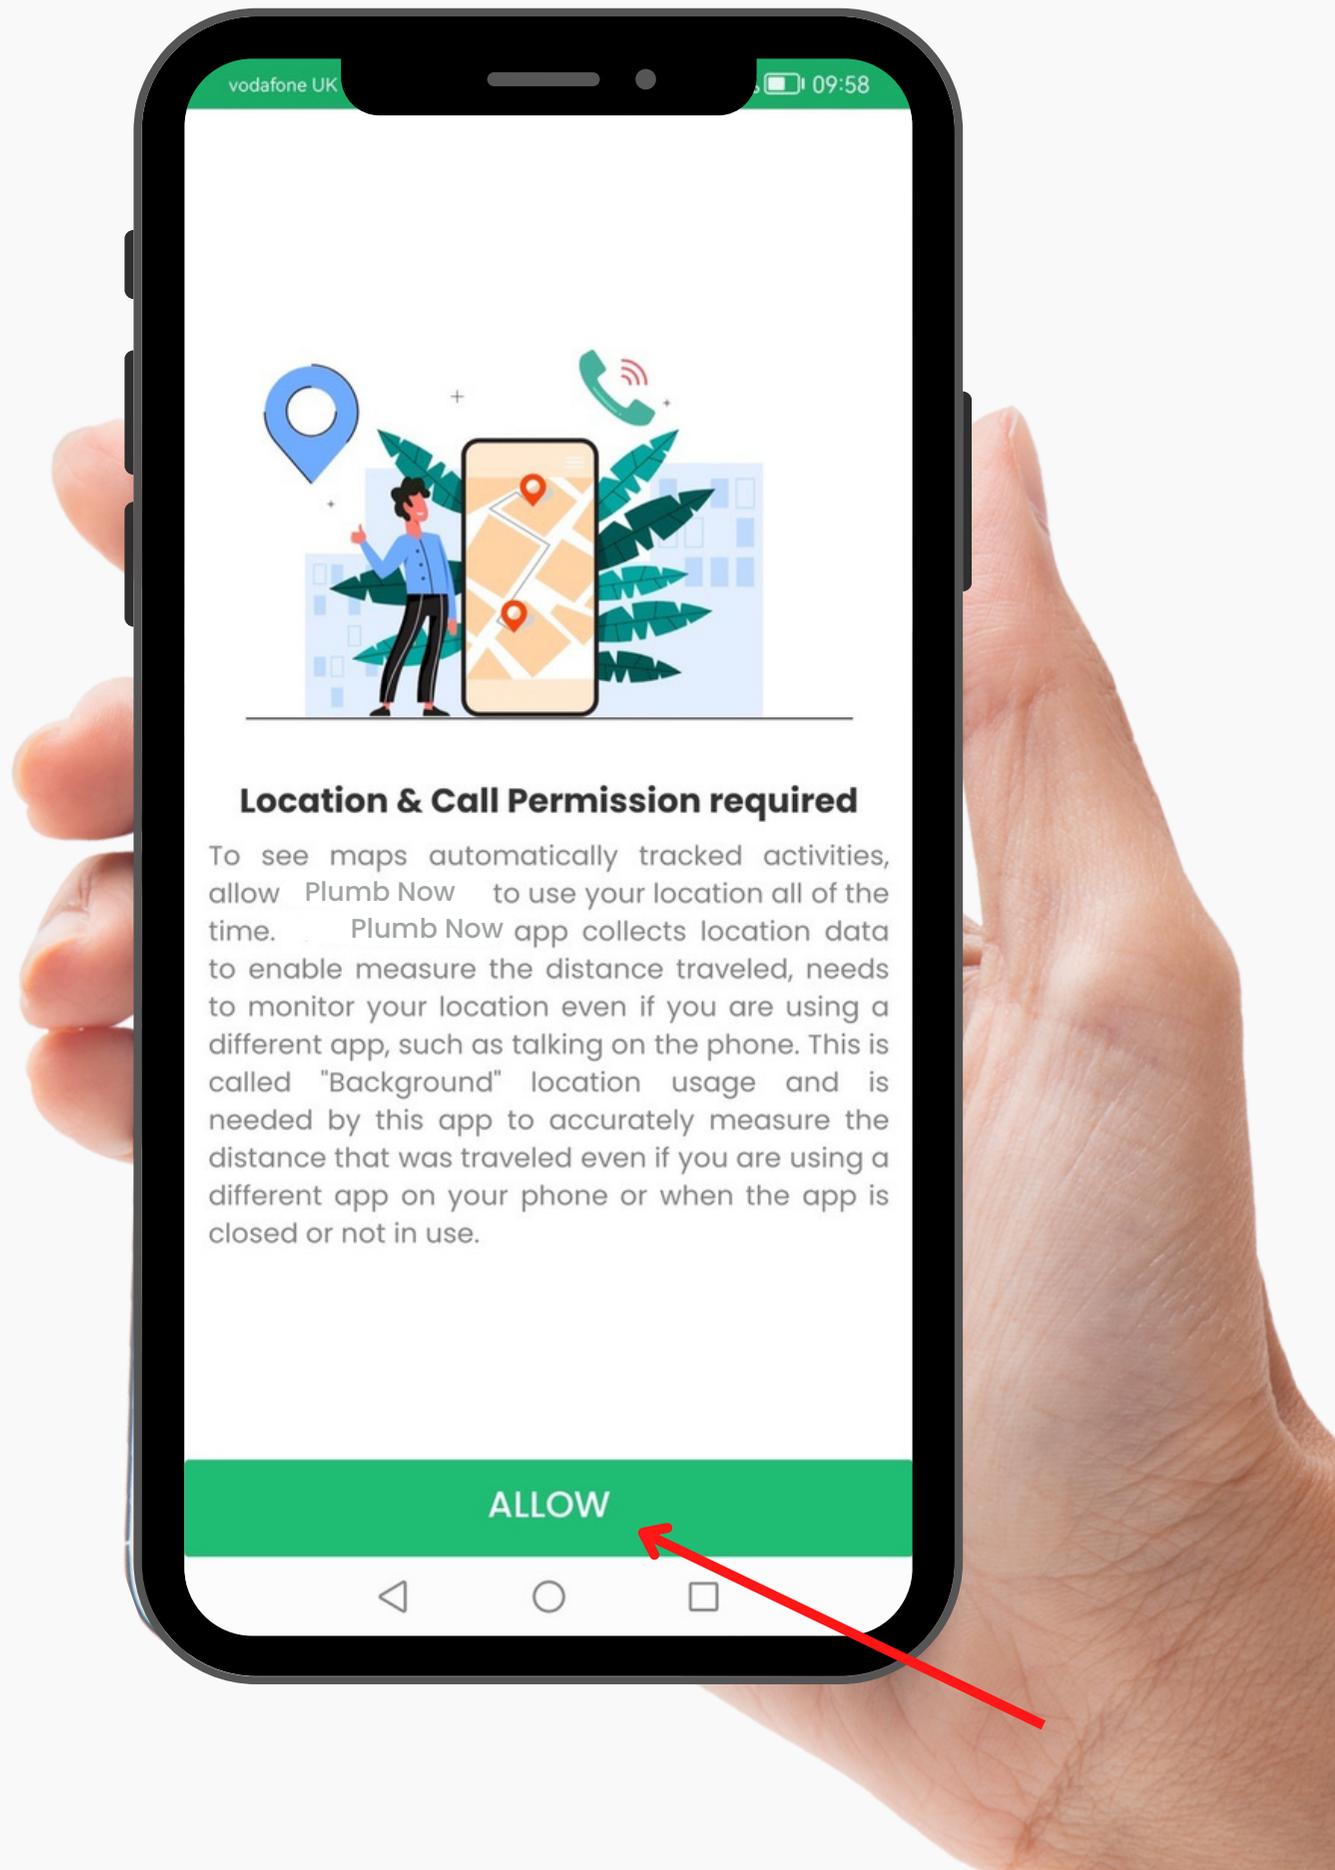

## Android Provider App Permissions

You will be asked to give permission to share your location

Select 'Allow'

You will then be asked to give permission for each setting individually

DOWNLOAD NOW

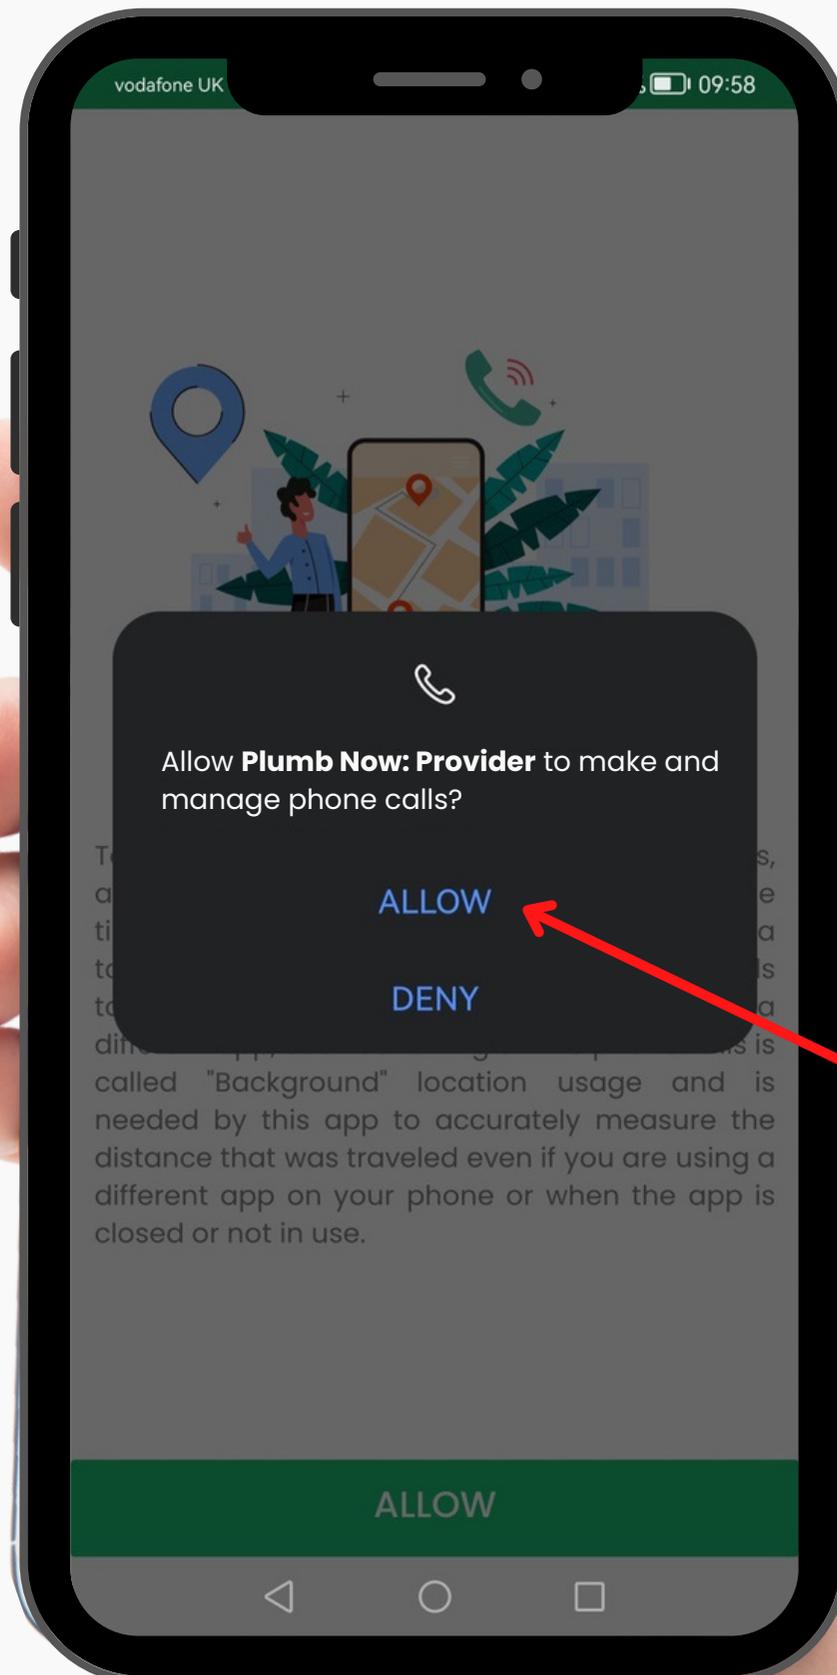

## Android Provider App Permissions

Select 'Allow' to make and manage phone calls

If you deny the access, customers won't be able to reach you by phone call while en route for any job

Therefore it is important to have this enabled

DOWNLOAD NOW

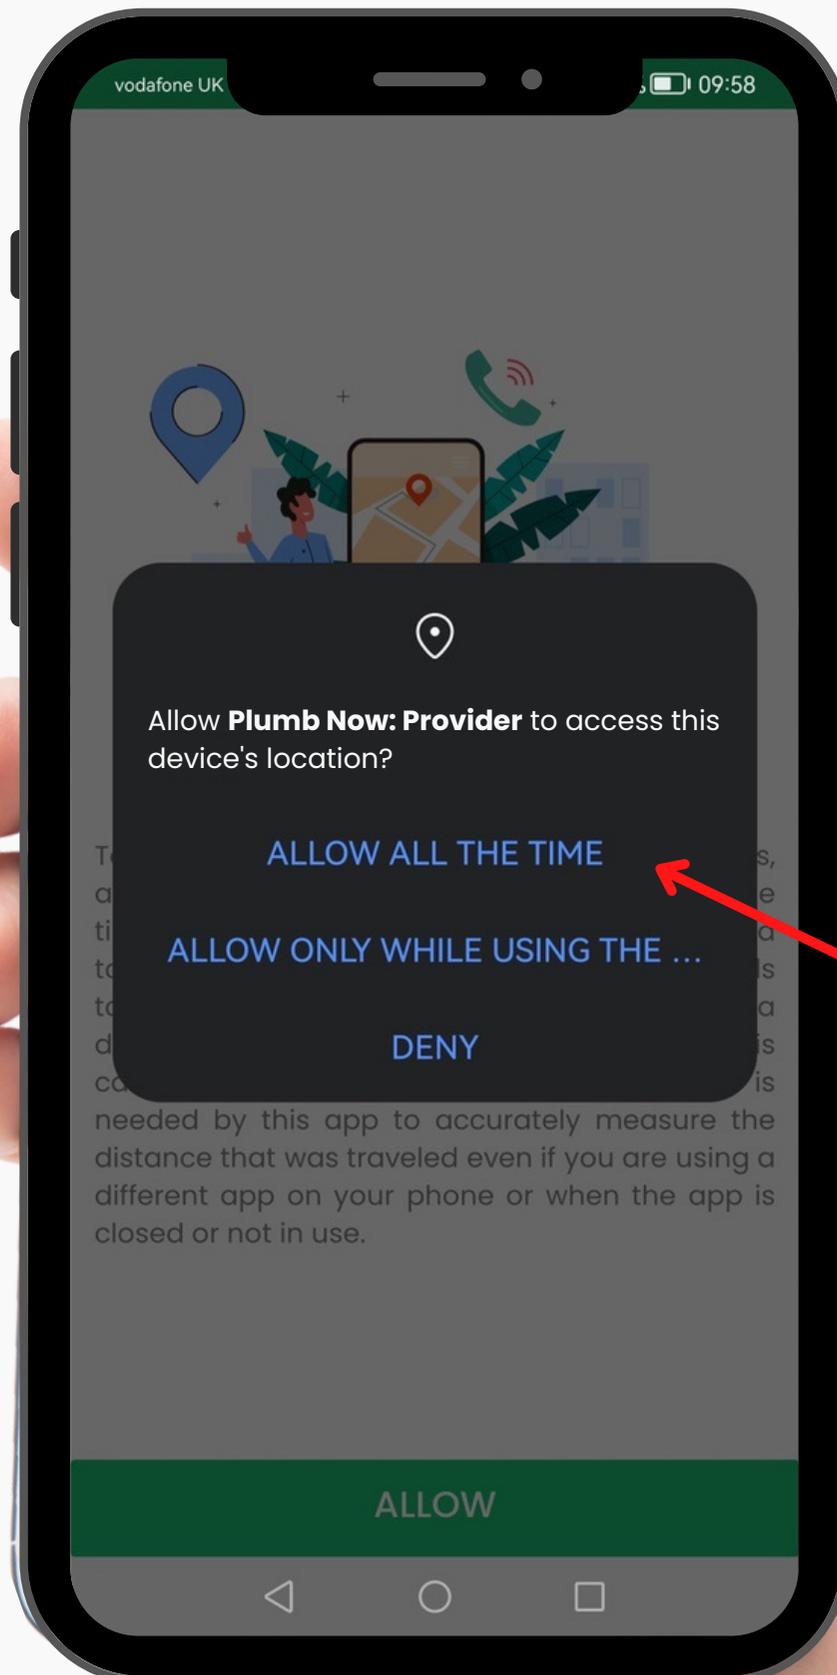

## Android Provider App Permissions

Select '**ALLOW ALL THE TIME**' for the app to access your location

In order to utilise the Live Tracking feature you need to grant permission to track your location

You will only be tracked when logged into the app

DOWNLOAD NOW

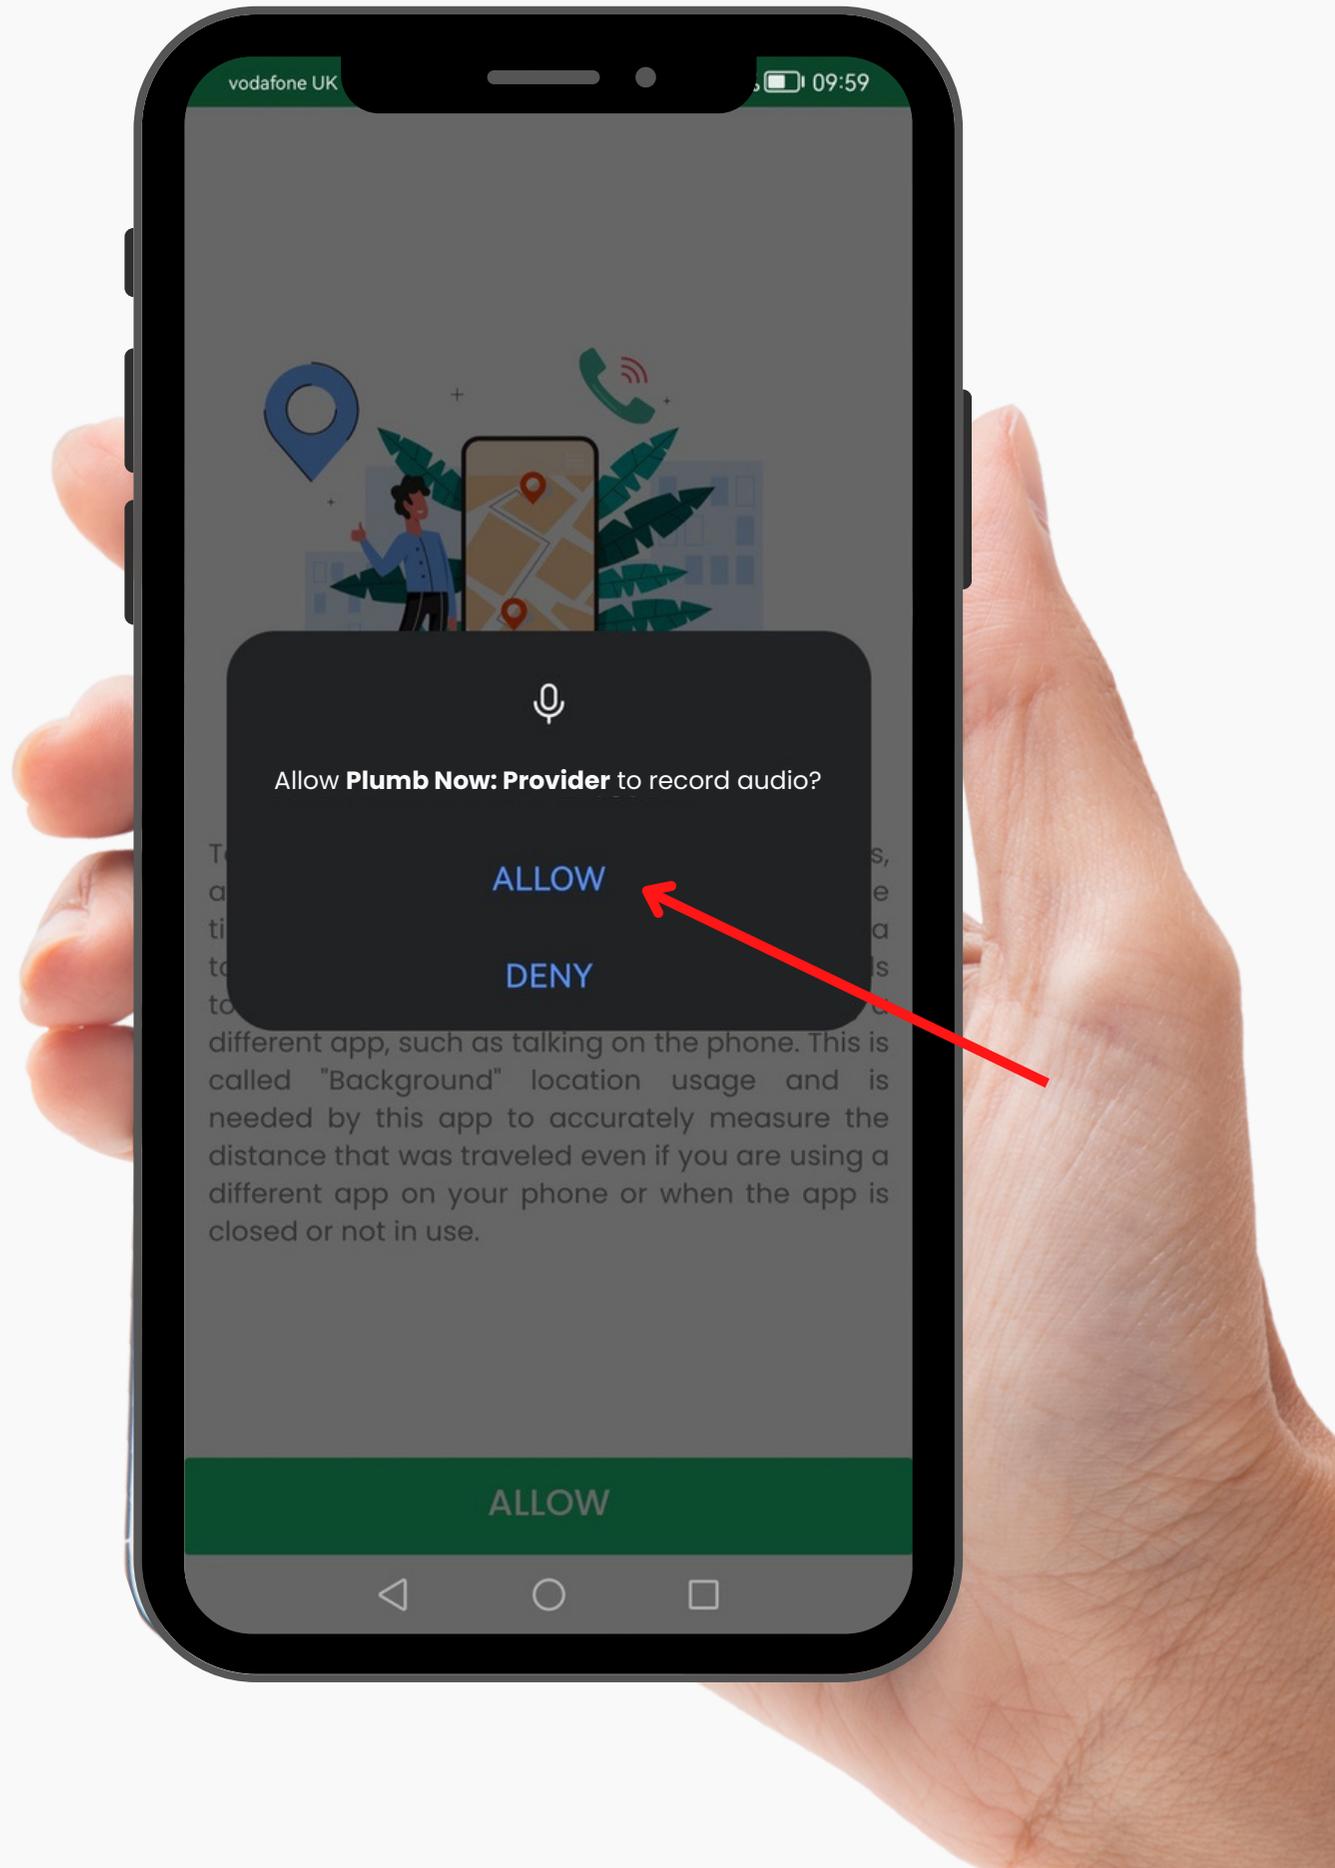

## Android Provider App Permissions

Select 'Allow' to grant access to your microphone

This ensures that you can use any voice features

This setting is only active while using the app

DOWNLOAD NOW

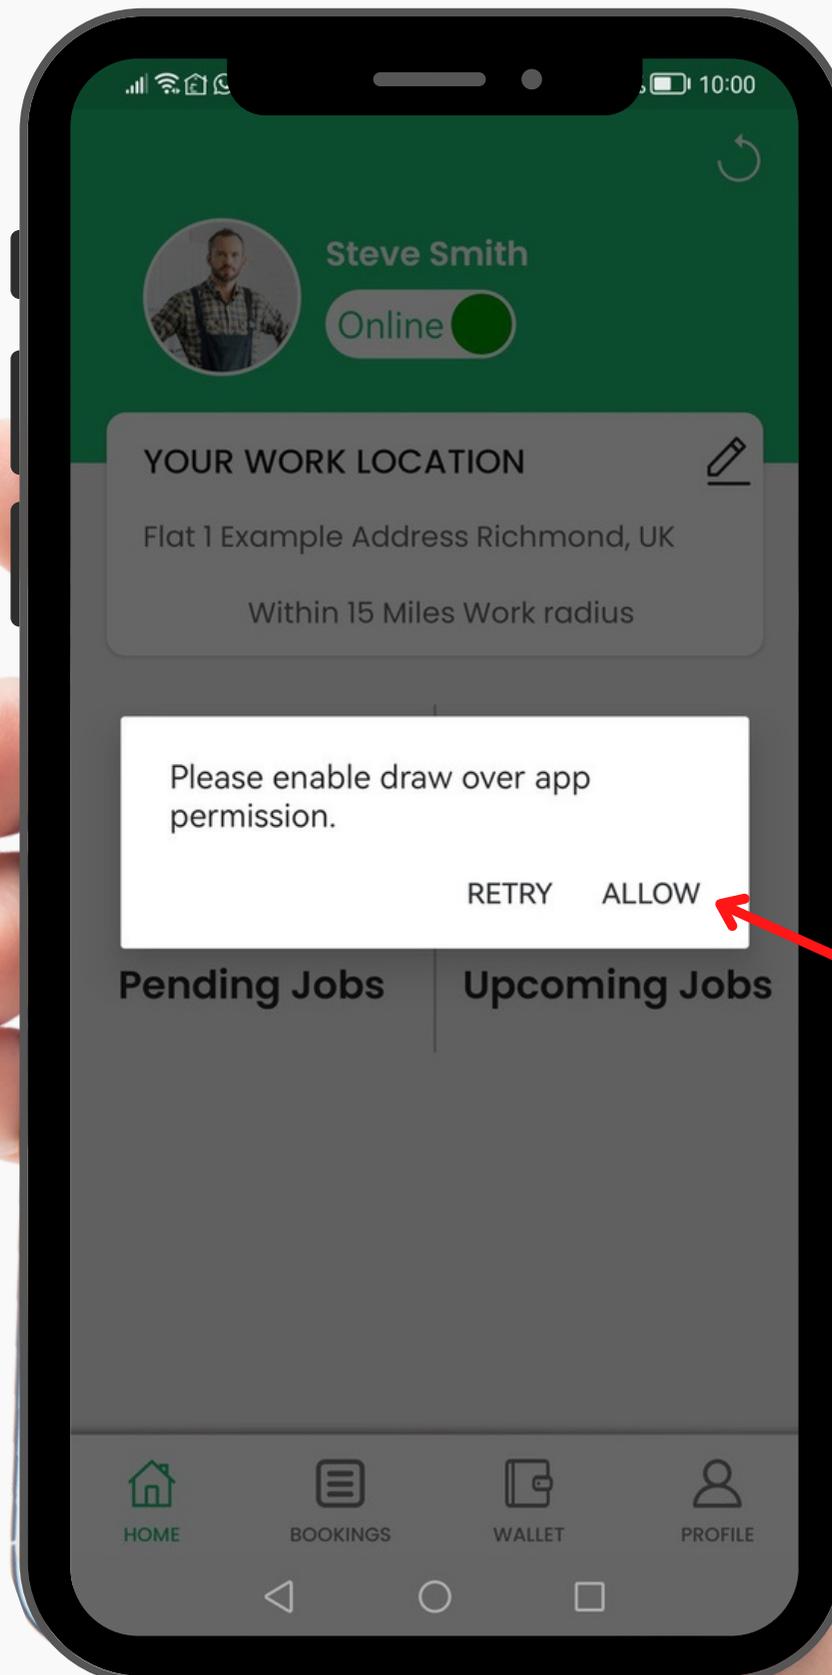

## Android Provider App Permissions

Select 'Allow' to give the app permission to draw over other apps which means it runs in the background

This is important so you can receive on demand bookings while the app is minimised

DOWNLOAD NOW

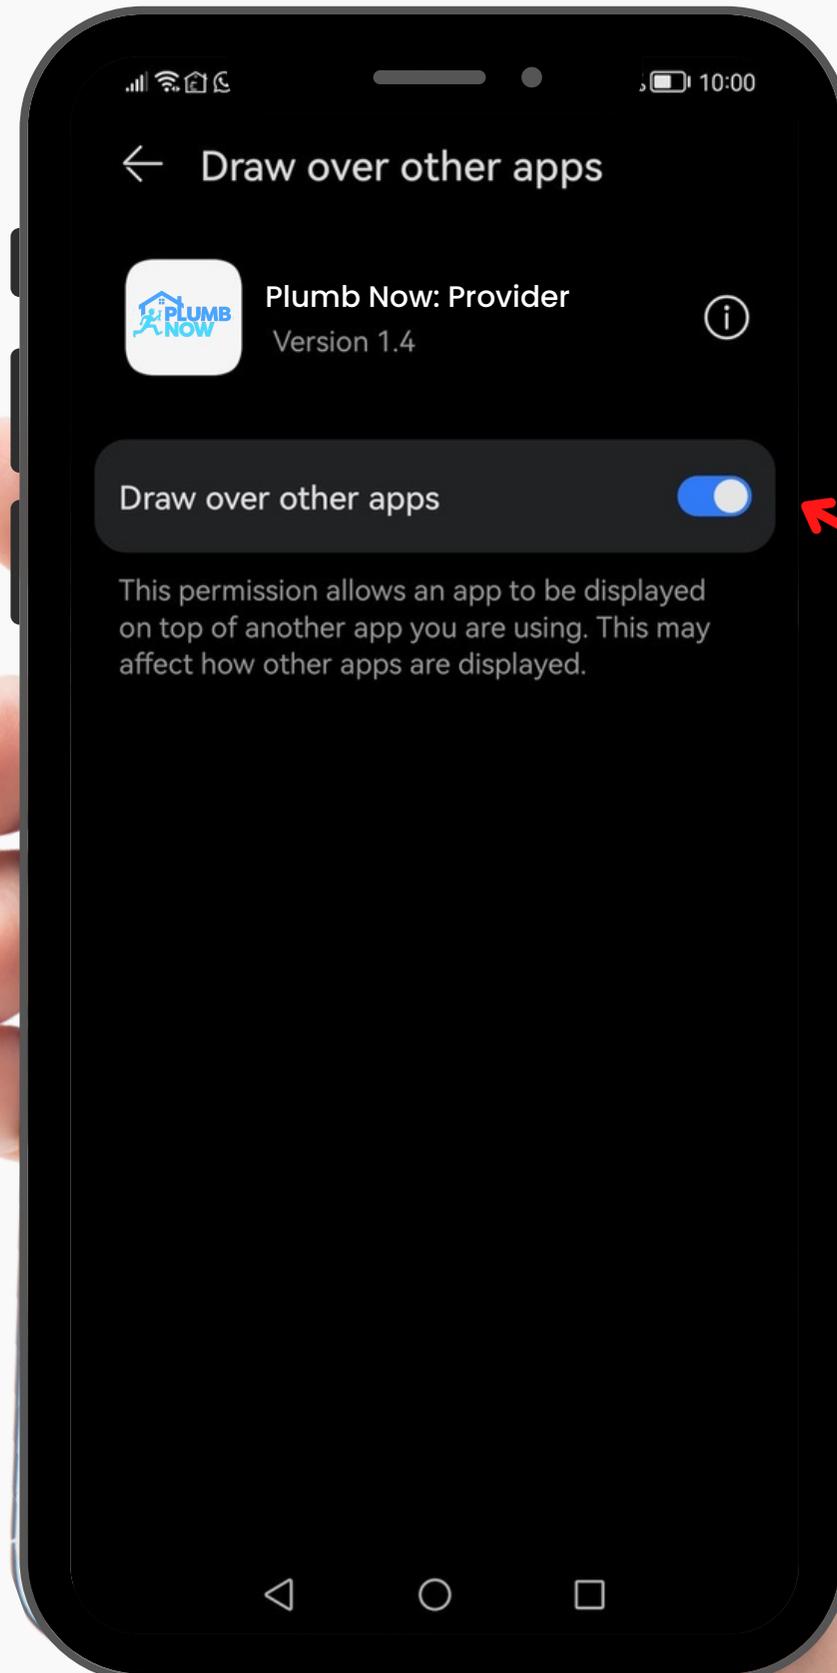

## Android Provider App Permissions

Following the previous screen your settings will open this screen

Swipe right on the toggle button to enable permission for the app to draw over other apps and run in the background

simply click the back arrow to return to the app

DOWNLOAD NOW

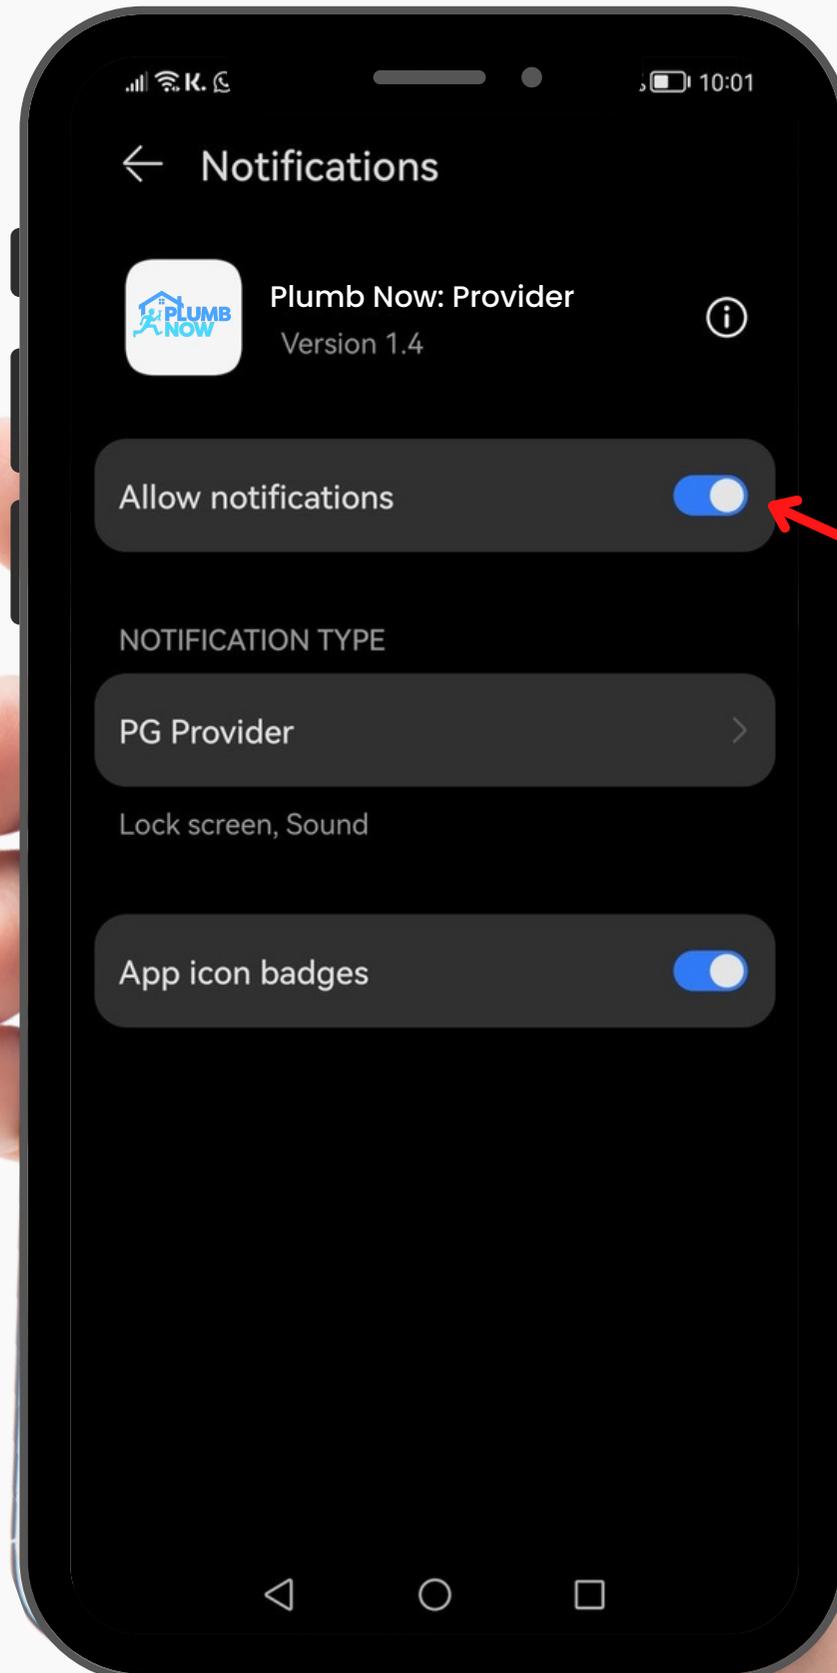

## Android Provider App Permissions

Please check the settings on your phone and ensure your notifications are switched on

Toggle tight to enable

This is imperative and allows push notifications for any incoming on-demand requests

DOWNLOAD NOW

## Android Provider App Permissions

Please check your settings and ensure location is set 'Always Allow'

Some phone models require you to select an extra button called 'Precise location' for the app to run smoothly

If the app does not work, then please check the Location Permission and Precise Location are enabled
